B2Sell Output works hand-in-hand with our Product Information Management solution, B2Sell Central. They integrate seamlessly: B2Sell Central allows you to store and manage product information and sync with Epicor ERP, while the Output module extracts the product information to create custom catalogs, brochures, price lists, technical documents, user manuals and more in a matter of minutes. Catalogs can integrate website links for more information or online ordering.

Reporting & Analytics module provide the insights to make business critical decisions on time. Reporting capabilities can be offered to customers and suppliers to allow them to be self sufficient.
